

M/Sgt. Guy Stern, disguised as Commisar Krukow

Typical propaganda leaflet, devised by our Psychological Warfare Section. (Original was actually fired. (See seared edges)

Wenn der Topp aber nu een Loch hat!

Durch Radio, Zeitungen und Sonderbefehle brüllen Dir Hitler, Himmler und Goebbels zu : „Totaler Krieg“, „neue Reserven“
Aber es gibt keinen „totalen Krieg“, denn es gibt keine neuen Reserven. Die Reserven sind Magenbatallione, Genesungs-Kompanien, Invalide, UK-Geschriebene. Was es gibt, ist das Zustoßen von Löchern. Und während man eins zustoßen will, wird das Loch an einer anderen Stelle immer grösser.

Foreign News: Out of the Pit

The first shock of horror had been absorbed, but this week came news of a monstrosity that appeared to top all previous tales of Nazi inhumanity.

To U.S. Army questioners a captured German doctor, Gustav Wilhelm Schuebbe, casually admitted that the Nazi Annihilation Institute at Kiev had killed from 110,000 to 140,000 persons "unworthy to live" during the nine months he had worked there. Dr. Schuebbe, a crippled drug addict who was head of the Institute, added coolly that he himself had killed 21,000 people.

The Nazi medico was very candid. The Institute had been established after the Germans took Kiev in 1941. Its human material included schizophrenics, Jews, foreigners, gypsies. Each doctor on the staff "processed" about 100 persons per working day with injections of morphine tartrate. Explained Dr. Schuebbe: the subject showed "breathing difficulties and a shrinking of the eye pupils; the face assumed a blue color; there was sporadic breathing; then a breathing stoppage and a heart stoppage. Exitus lethalis."

Dr. Schuebbe was scientifically detached in his motives. Said he:

"Of course, we, the circle of German physicians at Kiev, were aware of the importance of this job. Aside from certain devious phases of this action I still maintain that, just as one prunes a tree—by removing old, undesirable branches in the spring, so for its own interest a certain hygienical supervision of the body of a
